

Application No. 10/613,977  
Amendment dated October 13, 2005  
Reply to Office Action of June 16, 2005

Docket No.: 02309/000N001-USO

### AMENDMENTS TO THE CLAIMS

The listing of claims provided below will replace all prior versions, and listings, of claims of this application.

#### Listing of Claims:

Claims 1 and 2 (canceled).

Claim 3 (currently amended): A container comprising:

a container body with a receptacle portion for receiving therein a content and an opening at an upper edge thereof, and

a lid body ~~for engaging~~ with said container body to close said opening, and at least a pair of holes being formed in said container body or lid body;

for each pair of holes, a connecting member extending from one of said two holes to the other of said two holes ~~across~~ and within said receptacle portion; and

two toy members being secured on respective ends of said connecting member extending from respective two holes.

Claim 4 (currently amended): The container as set forth in claim 3, wherein said pair of holes are provided at a position above opposite side plates of said receptacle portion so that said connecting member goes in through one hole in one side plate and extend within the receptacle portion and goes out through the other hole in the opposite side plate.

Claims 5 and 6 (canceled).

Claim 7 (canceled).

Claim 8-20 (canceled).

{W:\02309\000N001000\00549-150.DOC (D:\02309\000N001000\00549-150.DOC) } 2

Application No. 10/613,977  
Amendment dated October 13, 2005  
Reply to Office Action of June 16, 2005

Docket No.: 02309/000N001-US0

Claim 21 (new): A container comprising:  
a container body having two pairs of opposite side plates and a bottom plate to define a receptacle portion, and  
a lid body for engaging with said container body to cover said container body, and  
  
said container body having two pairs of holes being formed therein;  
for each pair of holes, a connecting member extending from one of said two holes to the other of said two holes across and within said receptacle portion; and  
two toy members being secured on respective ends of said connecting member extending from respective two holes.

Claim 22 (new): The container as set forth in claim 21, wherein each pair of holes are provided at opposite side plates of said receptacle portion so that said connecting member goes in through one hole in one side plate and extend within the receptacle portion and goes out through the other hole in the opposite side plate.

Claim 23 (new): The container as set forth in claim 21, wherein an upper surface of said lid body having a dispensing opening, a small lid flap is provided on the upper surface of said lid body for opening and closing said dispensing opening, and said connecting member is positioned not to interfere with said dispensing opening.
